Gain experience through projects with external partners in the community

Theory in Action

Students have the opportunity to connect course material with experiences that occur through interactions with partners in the community. All community focused strategies contribute to addressing both student learning outcomes and identified community needs.

Community-Based Learning

External organizations and businesses are invited into the classroom to present pre-defined problems, questions or issues to be explored and analyzed. Students apply their knowledge in consultation with the Course Director to develop solutions and provide recommendations for the organizations' challenges.

Community-Based Research

Students work on a community situated research project that is part of a course, practically relevant to the community, collaborative and action oriented.

Community Service Learning

Students enter the community to provide direct service in an organization or on a community project, collaborating on a wide range of activities including mentoring, research, presentations, outreach and awareness, advocacy and policy development.

Take a course with practical experiences built-in for enhanced learning

Reflective Learning Activities:

Theory and concepts come to life in the classroom with concrete learning activities. These concrete experiences could take place within the classroom or outside the classroom allowing students to reflect on what they have experienced in relation to concepts/theories being covered in the course.

In-Course

Our students benefit from Reflective Learning Activities Reflective Learning Activities in the classroom through the use of:

- ◆ guest speakers
- ◆ role-playing
- ◆ skits
- ◆ case studies
- ◆ simulations
- ◆ workshops and labs.

Within-Community

Reflective Learning Activities outside of the classroom allows students to engage with the community to develop a more thorough understanding of course concepts through activities such as:

- ◆ executive interviews
- ◆ participation in community events
- ◆ observations
- ◆ field trips
- ◆ study abroad experiences
